**The maximum number of figures is four only.**

**Tables:**

Tables should be double-spaced and on a separate sheet of paper. Do not submit tables as photograph. Numbering of tables should be done consecutively in the orders of their first appearance in the text. Supply brief title for each. All tables should have no inside lines or bars. Give each column a short or abbreviated heading. Statistical explanations should be in table footnotes not in the heading. Explain in footnotes all non-standard abbreviations that are used in each table. Identify statistical measures of variations such as SD or SEM.

**The maximum number for tables is four only.**

**Illustrations:**

Submit the required number of complete sets of figures. Figures should be professionally drawn and photographed. Freehand or typewritten lettering is unacceptable. Instead of original drawings, roentgenograms, and other material; send sharp glossy and black-and- white photographic prints, usually 127 x 173mm (5x3 in) but no larger than 203 x254 mm (8 x10 in). Letters, numbers, and symbols should be clear and even throughout, and of sufficient size. Titles and detailed explanation belong in the legends for illustrations, not on the illustrations themselves. Each figure should have a label pasted on its back indicating the number of the figure, the names of the author on the top of the figure. .Do not write on the back of the figures, mount them on cardboard or scratch or mark them using paper clips. Do not bend figures. Cite each figure in the text in consecutive order.
